In 2015-2016 the program Product Management Fashion will start at Henan Institute of Engineering.

Apart from the management visits, last year in November until December 2014 eight of their Textile professors visited us to take a close look at our content and teaching methods. At this very moment six of our professors are visiting Henan to give lectures and to take a close look at both the content and the way of teaching. This coming year four of their professors will come over here for half a year to give lectures. So a lot of visits are organized to get as much similarity on both the content and the way of teaching.

For now we think there are still a few adaptations to make e.g. on the level of English for both teachers and students at Henan University. We have to keep on sending professors vice versa to keep on checking and adapting. We will also discuss with HNIE on the curriculum so as to have more of our courses being taught at HNIE.

As for now the program is running very fine. As soon as we find out the result of the students Product Management Textile, we might think of expanding the contract to other schools within Saxion.

I hope this is enough information, if you have question, don't hesitate to contact me.

Kind regards,

Erna Engelen-Fransen

To whom it may concern,

Being the program director of the Textile Engineering and Management course at Saxion University in the Netherlands, I herewith like to state that our cooperation with Henan Institute of Engineering and Saxion University of Applied Science for the undergraduate program on Textile Engineering is going very fine.

Saxion has worked collaboratively with HNIE to implement the agreement in accordance with China law and Dutch law. When starting of the program, we had several visits to discuss the content of the program. The program is an Undergraduate program on textile engineering between Henan Institute of Engineering and Saxion University of Applied Sciences. Students will be at Henan Institute of Engineering for four years and by succeeding get their bachelor degree. The courses will be settled by Saxion and HNIE. As the nominated HNIE degrees have been articulated to Saxion's textile management undergraduate degrees, HNIE students who successfully complete their three (3) year studies of the HNIE degree courses have the option of gaining three year credits at Saxion and enrol in the last year of studies at Saxion and by succeeding get their bachelor degree.

Based on our program, Henan started in 2013-2014 the program Product Management Textiles, now HNIE has 48 students enrolled in the program and the students who successfully finish the HNIE stage will come over to Saxion September 2017 until July 2018 to do their final year at Saxion. Saxion has assisted HNIE in teaching and management and ensure the selection of suitable Saxion academics for guest lecturing purposes. Saxion will ensure quality control of student candidates and all Saxion courses/units in accordance with Saxion Academic and Admissions policies.
